exe process is no longer running" when i'm trying to run the application on my new PC. All previous applications I created had no problem when i run them. But this one is an old application I don't have source code. Any help is appreciated. A: The issue was that i had Windows XP Service Pack 3 on my old PC which had the problem described above. I had to manually uninstall SP3 and reinstall and the problem was solved. Q: X is a vector space, V is a subspace of X and $x \in X \setminus V$,

$x = \langle v, a \rangle$ let V be a subspace of a vector space X , and $x \in X \setminus V$ then, how to show that $x = \langle v, a \rangle$? I don't know what is V and a ? Thanks in advance. If X is a vector space and V is a subspace then $x = \bigcup_{x \in V} \langle x \rangle$ and so $x = V \cup \langle a \rangle$.

Depression among Hmong refugees: a random-digit-dial survey. This study of Hmong refugees assessed the prevalence and characteristics of depressive disorders. Questionnaires were mailed to a random sample of telephone numbers in Fresno County, California, selected by the Fresno County Department of Public Health. One hundred questionnaires were returned. The overall response rate was 75.3% (95% CI = 71.4-79.2). The overall response rate was significantly lower among women than men (66.2% v 80.5%, respectively; chi-square = 9.88, P = .007). The overall response rate was significantly lower among respondents with less than a high school education compared to those with a high school education or more (58.1% v 79.8%, respectively; chi-square = 11.33, P = .005).

The prevalence of major depression (DSM-III criteria) among Hmong respondents was 15.6% (95% CI = 10.6-20.6); the prevalence of minor depression was 10.1% (95% CI = 5.9-14.3). Hmong 82157476af
